#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 8, 9, 17 and 22 are rejected under 35 U.S.C. 102(e) as being anticipated by Tsukiji, of record, for the reasons given in the previous action, hereby incorporated by reference. The structure shown in Tsukiji is essentially the same structure shown in applicant's Fig. 3 and meets the recitation of amended claims 8 and 9. That is, the "gate insulating layer" (102) in Tsukiji is situated over the entire length of the channel, and substantially less than the entire length of the source and drain regions. Just as shown in Fig. 3 of the instant application, the thicker parts of the gate insulating layer, which are in contact with the substrate surface, do not extend substantially over the source and drain regions.

Applicant argues that the layer (122) in Fig. 5G of Tsukiji extends substantially over the source and drain regions, contrary to the claim limitations, however, Tsukiji does not consider this insulating layer as part of the gate insulation, per se, but rather refers to this overlying layer as an inter-layer insulator (see col. 7, l.60-65). Consequently, the actual gate insulating layer of Tsukiji would meet the claim limitation of extending substantially less than the entire length of the source and drain regions.

Indeed, those skilled in the art recognize that applicant's own Fig. 3 depiction represents an incomplete structure in that clearly additional insulation layers, formed around source/drain contacts, would be needed to complete applicant's own device, almost certainly resulting in additional inter-level insulating layers being formed above the source and drain regions, similar to what is shown in Fig. 5G of Tsukiji.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 14-16 and 19-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tsukiji, and further in view of Libera et al, of record, for the reasons given in the previous action, hereby incorporated by reference. These rejection of these claims, which are dependent on amended claims 8 and 9, is maintained for the reasons discussed above, with regard to the Tsukiji reference.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Edward J Wojciechowicz whose telephone number is 703-308-4898. The examiner can normally be reached on Monday through Wednesday.
